TURFACE
5-STAR
PACKING CLAY

HIGH PERFORMANCE AT
A COMPETITIVE PRICE

OUR LINEUP JUST GOT BETTER

Turface Athletics has a proven history of raising the bar with high-performance products; and our new packing clay adds to that legacy, delivering performance and value like never before. Turface 5-Star Packing Clay gives coaches and groundskeepers even more options to construct and maintain mound and plate areas. It's a premium clay that combines a professional look and reliable performance with easy installation and maintenance – all at a competitive price.

- **High density** – red clay material with a high silt and clay content for strong bonding during installation
- **Ready to use** – just open the bag, pour, and pack
- **Durable** – stands up to high levels of on going wear, even with larger athletes
- **Versatile** – used at all levels of play and from coast to coast
- **Packaged right** – available in truckloads (bulk), 50-lb. bags or 2,000-lb. Super Sacks

Choose the solution that works best for your performance needs and budget.

Turface Professional Mound Clay Red®

A premier, 100% virgin clay featuring high density for superior durability and unmatched wear resistance; also offers easy pliability and shaping on mounds or around home plate.

- Preferred by professional and college teams
- Available as a shredded clay or in pre-formed blocks
- Easy installation – ready right out of the bag
- High level of durability in a range of climates, to reduce wear across a variety of fields

Turface 5-Star Packing Clay™

A reliable, high-density mound and plate clay that's easy to install and maintain – at a competitive price.

- Clay-silt mixture bonds firmly and quickly to help streamline installation
- Highly durable for long-lasting performance and wear resistance
- A good fit across different geographies and climates, and suitable for all levels of play

Turface All-Purpose Clay®

An affordable sand/clay mixture for mound and plate construction and repair, or to amend sandy infields. Requires lower maintenance than high-clay products for easier management, especially helpful across multiple fields!

- Helps maintain moisture and firm up soft, sandy areas for safe footing and consistent play
- Easy to use material for fast installation and smooth shaping
- Saves time and reduces the amount of field care needed
- Outperforms other clays in its class
- Great for multi-plexes – holds up over a series of games and fields

Full Construction - Mound and Plate: Turface 5-Star Packing Clay - Recommended Quantities

FIELD	AREA	RADIUS	SIZE	QUANTITY*
Baseball	Mound	9'	10" Height	7 tons
	Homeplate	13'	4" Depth	12 tons

	Homeplate	10'	4" Depth	8 tons

*Quantity shown is approximate quantities only. Please call our office or contact your sales representative to discuss your unique situation.

Mound Maintenance: Approximate Number of 50-LB Bags for Mound and Plate Area

	4" DEPTH	6" DEPTH
Table	11 bags	17 bags
Landing Area	20 bags	30 bags
Batter's Boxes	38 bags	58 bags
Catcher's Box	13 bags	20 bags
TOTAL	82 bags	125 bags

Number of bags may vary depending on the size of the mound and batter's box.
One pallet contains 40 bags.
One bag weighs 50 pounds. One bag covers 5 square feet x 1" thick (compacted).

"The Turface 5-Star Packing clay that we used to build our new visitor's bullpen mound has performed extremely well. I have numerous coaches tell me, unprompted, how much they love the material. They all say how well it holds up even when using it for an extended period doing multiple bullpen sessions. We often do not have to fix it after a game, and when we do, the holes are minimal. Most importantly, our performance rating on our bullpens, which is rated by the coaches and managers, went up from a 3.5 to 4.1."

—Stephen Watson, NCCTP
Head Groundskeeper, Grainger Stadium
Down East Wood Ducks
