 **AMERICAN WOOD FIBERS**

800-624-9663 • www.awf.com

Saves Money. Saves Time. Cleans Easier. Dust Free.

The story behind **America's Choice® PREMIUM MINI FLAKE** is quite simple. By triple sifting our shavings, we achieve a small, uniform and highly absorbent flake. **PREMIUM MINI FLAKE** gives you the same great benefits as pellets but without the hassle of wetting them down, waiting for the pellets to break down, or worrying about irritating dust! To put **PREMIUM MINI FLAKE** to the test, we recently participated in a bedding study with a major university. They set up three stalls, one containing wood shavings, another with pelleted bedding and the last stall with **PREMIUM MINI FLAKE**. The results showed that our **PREMIUM MINI FLAKE** cut stall cleaning time in half and less bedding was wasted. **Many equine beddings promise low dust—PREMIUM MINI FLAKE delivers! A dust free, easy to clean stall is healthier for your horse and means you spend less time and money mucking, and more time enjoying your horse!**

Three Easy Steps to a Cleaner Stall.

Scoop

Shake

Toss

The first step is to use a traditional manure fork and scoop under the desired area.

Simply scoop manure up and gently shake, allowing the clean bedding to fall through the fork. This exposes only the unwanted manure for disposal. The result – no waste!

Finally, dispose of the particle free manure. You'll find your waste disposal is dramatically reduced. Freshen the stall with additional **PREMIUM MINI FLAKE** as needed.
