Feeding Directions

FORREST'S FAVORITE 14% Hi Mag Livestock Mineral (this product) should be offered at least 30 days before the grass becomes lush and should continue feeding the product until the grass growth slows and the pasture dries out. Feeders should be adequate in number and placed in feeding or loafing areas. This product is not to be supplied as the sole source of vitamins and minerals. Provide fresh clean water at all times.

WARNING: This product, which contains added copper, should not be fed to sheep or any species with a low tolerance to supplemental copper.

CAUTION: Follow label directions.

Consumption of Selenium should not exceed 3 mg per head per day. Feeding 4.0 oz. of this mineral will provide 3mg Selenium per head daily.

This product was manufactured in a facility that does not handle or store products containing animal proteins prohibited in ruminant feed as described in 21 CFR section 589.2000.

"This feed was produced in a facility certified in the American Feed Industry Association's Safe Feed/Safe Food Certification Program; for details go to: www.safefeedsafefood.org."
